So thousands of other travelers to the capital. If you're anything like us, you're probably not sure that you can justify opening your wallet at the expense. After all, Tokyo is relatively safe and well marked, so you can't make your own way around? The short answer is yes, but guides can be very profitable in certain situations. Here we'll see when you can use one, and what are your options (including those that aren't worth a single yen). If you are only going to be here for a few days, this is your first time, or you are a resident, but there are people come to visit and you can not get off work, then having a guide in Tokyo can be helpful. This is a good way to make sure you (or your friends and family) get to see the main attractions in the city without feeling lost or overwhelmed. Guides will help you Your time spans a lot of land, and experiences awesome local locations that you won't necessarily find on your own (but: see the DIY section below for reservations on the subject). They can help you interact with the locals (having someone who can speak Japanese is not helpful) as well as answering the questions you have about famous landmarks and their history. A group tour can be cheaper, but sometimes restrictive. | Photo: iStock.com/Page Light StudiosShould Do I book a private or group tour? Group tours are usually cheaper, and allow you to fit in the background and avoid a lot of chatting with the guide, but the lack of individual attention can be frustrating if you have questions about the sights you have shown. They can also be very restrictive in terms of choice and movement; You may find yourself shunted from one glance to the next in a short time. However, group tours fit some cheapos perfectly, and can provide a fun experience and the opportunity to make friends with other tourists. Private tours can usually be adapted to suit your interests and schedule, and give you the opportunity to gain a deeper understanding of the area. There is also more flexibility when it comes to making changes to the route, like a spontaneous stop for ramen or a selfie next to a creatively named institution (coughing, grope in the dark and so on). While some private tours can be expensive, there are a number of options available, and a bunch of freebies, too.
